

Parminides – Becoming from a Structure, and Life as Becoming – Jewish  
Optimism in Hebrewaisne  
By Shomit Sirohi

I. Parminides

The many Ones, which then is many Circles and Structures finally  
Ptolemy's Spheres which then means so many possible Worlds or even  
Lesser and Greater Logics which arrange in Sirohi – the Greater Logic of  
A Draft and Lesser Logic of Existentialism and Marxism – with  
supplements in automaton and even lyricism, physician check ups and  
Hebrew psychoanalysis – all of which is a structure of lesser logics and  
greater logics all articulated as sexual difference classification – higher  
Kabbalah life of playing games and spiritual philosophy and lower life of  
daily ontic activity, and higher life of sex, women and talking to her on  
the phone, which mixes up into Hebrewaisne.

II. Becoming –a Flow of Life and Expression – the way to Express  
Yourself as a Fulfillment of a Wish – Freud's talking cure in  
Lacan as theoreticism, which in Sirohi is optimistic thinking,  
quiescence and Buddhism

Organise the circles of in fact Parminides into circles of Kabbalistic  
speaking and jokes, optimism is then also knowing oneself as Ortega y  
Gasset knows Dasein.

III. Torah, Talmud and Kabbalah therefore

Imagine one sentence books – The Prophet is arrival, in jokes and  
happiness, of his last trial, which is to form Hebrewaisne.
